

[Download Instructions](#)

STEP 1. Create a Customer Portal account, if you have not done so already. If not, go to www.solidworks.com/customerportal and either create a new account or login to your existing account. You will need your serial number to do this. Ex. 9710.... (24-character code)

STEP 2. When your account is set up, go to “Register My Products” under My Support. Enter your serial number and then choose the 2019 Edition from the pop-up box (*be sure the Pop-up Blocker feature is disabled in your browser*). Once the product is successfully registered, the padlock icons will disappear and you will have access to all the features in your Customer Portal account including the resource site, www.my.solidworks.com.

Please note: you must have an active Subscription Service if you wish to continue to enjoy all the features of the Customer Portal and www.My.SolidWorks.com

STEP 3. Once you are on your dashboard just navigate to “downloads and updates”. The latest available version will be there waiting for you.

We are no longer automatically sending Media Kits due to the ease of downloading from the SolidWorks portal. If your situation does require a Media Kit, please don’t hesitate to contact us and we will mail a media kit to you promptly.

You can also download the PDF (non-printable version) of the latest text book by going here:

http://files.solidworks.com/pdf/EDU_Curriculum_Location_Instructions_ENG_2018.pdf
(although this file says 2018, nothing has changed)

Thank You for allowing us to continue to be of service to you and your students.
